(54) Title: ARRANGEMENT IN THE ON-LINE FINISHING OF THE PAPER MACHINE

(57) Abstract: The invention relates to an arrangement in the on-line finishing of the paper machine, which includes at least one finishign stage (12, 13) for the paper web produced in the paper machine. The arrangement comprises cutting equipment (16) for forming the tail as well as tail threading equipment (15) for carrying the tail through the finishign stage (12, 13). At the end of the finishing stage (12, 13) there is a draw point (24), through which the carrier rope system (17) included in the tail threading equipment (15) is adapted to pass. The draw point (24) is formed between one cylinder (28) and a wire (29) arranged in contact with it for forming a single-contact draw point.
